

## AQUAGUARD PLUS

For freshwater

### New formula:

The research and development department of "AZOO PLUS" has developed and updated the formula of its water quality stabilizer "AQUAGUARD PLUS," creating the most advanced multi-functional conditioner for the care of tropical fish on the market. It contains a variety of organic ingredients that enhance the buffer capacity for the pH value of the aquarium. This product instantly converts tap water into healthy water with the natural water quality found by fish in their natural environment.

### Highly concentrated.

Its formula is optimized to achieve high concentration and excellent performance:

**1ml of product treats 10 liters of water in your aquarium.**

### The perfect mechanism for fish protection.

You can fully trust "AQUAGUARD PLUS" for the care of tropical fish in your favorite aquarium thanks to its stabilizing effect, which will maintain a healthy water quality. Our advanced formula implements technology that brings a completely new generation of components, providing fish with a much greater protection mechanism than before:

- 1.- Instantly removes ammonia (NH<sub>3</sub>), residual chlorine, chloramines, and heavy metals in the aquarium water.
- 2.- Immediately neutralizes chlorine and heavy metals contained in tap water.
- 3.- Contains antibacterial ingredients that inhibit the growth of pathogens and protect the mucous membrane of fish.

### Vitamin B<sub>1</sub>, B<sub>2</sub>, y B<sub>6</sub>.

Yes! The new water quality stabilizer for tropical fish "AQUAGUARD PLUS" contains an abundant amount of B-complex vitamins, which will help alleviate their stress, boost their immune system, and promote their metabolism. This allows tropical fish species to easily adapt to changes in their environment.

### FEATURES:

- 1.- Specially formulated to provide the best care for tropical fish.
- 2.- Perfect protection mechanisms for fish. Instantly eliminates ammonia (NH<sub>3</sub>), chloramine, residual chlorine, heavy metals, and other toxic substances produced in the aquarium.
- 3.- Contains a variety of beneficial organic ingredients such as almond leaf extract, which provides a significant antibacterial effect among other properties. It can emulate a natural chemical environment that allows fish to quickly adapt and develop with a natural and healthy appearance.
- 4.- Balances pH value, effectively reducing fluctuations after partial water changes, thus generating greater chemical stability.
- 5.- Creates a mechanism that strengthens the fish's body, forming a unique antibacterial film that protects their skin and gills. Similarly, this protective layer effectively prevents wound infection, accelerating healing.
- 7.- Enriched with B-complex vitamins to strengthen the fish's immune system and promote metabolism. This allows for healthy growth and helps develop a well-proportioned body.

### Main components:

Vitamin B<sub>1</sub>, Vitamin B<sub>2</sub>, Vitamin B<sub>6</sub>, Sodium Bicarbonate (NaHCO<sub>3</sub>), Citrus Extract, Citric Acid, Humic Acid, Tropical Almond Leaf Extract (*Terminalia catappa*), and Distilled Water.
