

DESCRIPTION:

Aquaguard Plus is a premium conditioner for freshwater aquariums. This multifunctional additive for aquarium care instantly removes Ammonium (NH₃), chloramines, residual chlorine, and heavy metals, while also providing a stabilizing effect on water quality. It contains numerous special organic materials that strengthen the pH buffering capacity in the aquarium, instantly converting tap water into a natural environment for tropical fish. Its advanced formula contains natural, antibacterial ingredients that inhibit the development of pathogens and protect the fish's mucous membranes. It is rich in vitamins B₁, B₂, and B₆. B-complex vitamins help reduce stress, boost the immune system, and enhance fish metabolism.

In an aquarium, there are certain critical moments that affect the health and stress of fish, which, if overlooked by the hobbyist, could be the cause of subsequent diseases. Situations such as water changes, bottom cleaning, acclimation of new specimens, or transportation can drastically alter the physicochemical conditions of the water. These sudden changes in temperature, pH, and GH, or the sudden increase in toxins such as ammonia or nitrite, directly affect the physiology of the fish, testing their immune system and resilience.

Aquaguard Plus is the best ally to successfully avoid such potentially dangerous situations, alleviating both the harmful immediate effects of tap water and the dangerous secondary effects related to ammonia. On the other hand, all maintenance tasks obviously involve a considerable increase in fish stress. Stress is a well-documented factor as a trigger for various pathologies, a limiting factor for proper development, or a serious obstacle to reproduction. The advanced formula of Aquaguard Plus reduces stress in fish immediately, preventing its undesirable consequences.

INSTRUCTIONS:

For new aquariums, use 20ml of AZOO Aquaguard Plus per 100 liters of aquarium water.

For water changes, add 10ml per 100 liters of new water. For regular use, add 5ml of product every week.

NOTES:

To ensure proper dispersion, add the additives to an area of the aquarium with sufficient flow. For water changes, you can add the additives to the water before pouring it into the aquarium. Avoid mixing different additives before adding them.

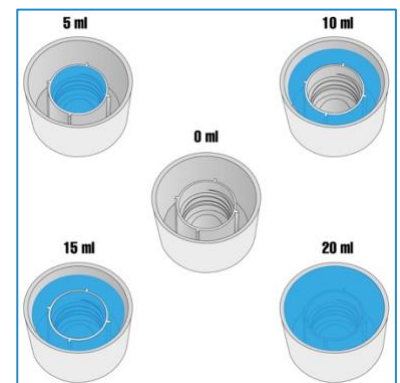

Some aquarium products may chemically react with others; try not to combine multiple products at the same time to avoid precipitation or unwanted reactions.

MAIN INGREDIENTS:

Vitamins B₁, B₂, B₆, Sodium Bicarbonate, Citrus Extract, Citric Acid, Humic Acid, *Terminalia Catappa* leaf extract, and distilled water.

The bottle cap will help you measure the dose accurately:

- The inner cavity holds 5ml. capacity.
- The volume between the inner and outer cavities contains 10ml.
- Both filled cavities contain 15ml in total.
- The cap filled completely contains 20ml.

ATTENTION:

- NOT SUITABLE FOR HUMAN CONSUMPTION.
- KEEP THE PRODUCT AWAY FROM CHILDREN AND PETS.
- SHAKE THE CONTAINER BEFORE USE.
- CLOSE THE CONTAINER TIGHTLY AFTER EACH USE.
- STORE THE CONTAINER IN A COOL AND DRY PLACE, AVOIDING DIRECT SUN EXPOSURE.
- FOR EXCLUSIVE USE IN AQUARIUMS WITH ORNAMENTAL FISH.
- DO NOT INGEST, IN CASE OF EYE CONTACT, RINSE WITH PLENTY OF CLEAN WATER AND SEEK MEDICAL ATTENTION.
