

PLANT PREMIUM

For aquatic plants

SIMPLE AND NATURAL

PLANT PREMIUM is a premium fertilizer ideal for all types of aquatic plants. In a simple and natural way, Nature Gro Plant Premium contains all the essential nutritional requirements for vigorous and healthy growth in all planted aquariums in a single additive, providing them in a balanced proportion that plants need.

This product is the result of extensive work in the research and development department of **AZOO** in Taiwan, achieving maximum simplification of the highly complex process of fertilizing aquatic plants.

It contains a comprehensive combination of macro-nutrients and micro-nutrients, along with an enhanced chelated formula of ferrous iron and other organic nutrients, which allow for very high efficiency in the photosynthetic processes of aquatic plants.

Highly concentrated.

Its formula is optimized to achieve high concentration and excellent performance:

1ml of product treats 10 liters of water in your aquarium.

FEATURES:

- 1.- Specially formulated for the professional care of aquatic plants in aquariums.
- 2.- Contains a comprehensive combination of micro-nutrients, macro-nutrients, and trace elements in the proper proportion and quantity, along with a chelated form of iron in ferrous state and organic nutrients, covering all the needs for both red and green plants, achieving vigorous development in the most natural way.
- 3.- Significantly increases photosynthesis efficiency and nutrient absorption rate.
- 4.- Formula specially designed to prevent algae growth.

Main components:

Iron DTPA chelate (DTPA-FeHNa), zinc chelate (EDTA-Zn), copper chelate (EDTA-Cu), boric acid $B(OH)_3$, magnesium chelate (EDTA-Mn), dipotassium phosphate (KH_2PO_4), potassium nitrate (KNO_3), and distilled water.

PLANT PREMIUM

Reference	Size
NG11801	120ml
NG11802	250ml
NG11803	500ml
NG11807	1000ml
